DexAge

Introduction

DexAge is a permissionless, trustless, decentralized exchange platform that will enable its users to control and authorize their transactions. It will work on user-centric approach where through a blockchain- based social web the users, traders and investors will interact with each other and influence the growth and development of the DXG platform.

The use of a blockchain based decentralized network will help solve many challenges that occur with centralized exchanges. Using referral schemes, staking & voting rights and portfolio diversification, the platform will empower its stakeholders and drive the mass adoption of DexAge.
